4. First Aid Measures				
General Advice:	If immediate medical attention is required, show this material safety data sheet to the doctor in attendance. If symptoms persist, call a physician.			
Eye Contact:	Flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. If irritation develops, get medical aid.			
Skin Contact:	Wash with soap and water if irritation occurs. Consult your medical professional if irritation persists.			
Ingestion:	Never give anything by mouth to an unconscious person. Wash out mouth with water. Do not induce vomiting unless by medical personnel. Seek medical attention immediately.			
Inhalation:	Remove to fresh air and keep patient at rest. Seek medical attention immediately.			
5. Fire Fighting Measures				
Extinguishing Media:	SUITABLE: Powder, CO ₂ , Foam, Sand NON-SUITABLE: Water jet			
Hazardous Combustion Products:	When heated to decomposition, produces Carbon Monoxide (CO), Carbon Dioxide (CO ₂), acrid smoke and fumes.			
Fire Fighting Procedures:	When possible, prevent environmental run-off. Use self-contained breathing apparatus and protective clothing. Water mist may be used to cool barrels containing more product, preventing explosion.			
Fire / Explosion Hazards:	Flammable liquid and vapor. Vapors are heavier than air and may travel along surfaces to remote ignition sources and flash back.			
6. Accidental Release Measures				
Health and Safety Precautions:	Personnel involved in cleanup should wear appropriate personal protective equipment (see Section 8). Minimize exposure. Eliminate all sources of ignition and ventilate area using explosion-proof equipment.			
Measures for Cleaning and Collecting:	Slippery when spilt. Clean up immediately to avoid accidents. Increase ventilation. Collect and seal material in proper containers for disposal.			
Measures for Environmental Protections:	Place waste in an appropriately labeled, sealed container for disposal. Care should be taken to avoid environmental release.			
Additional Considerations for Large Spills:	Non-essential personnel should be evacuated from affected area. Report emergency situations immediately. Clean up operations should only be undertaken by trained personnel.			
7. Handling and Storage				
General Handling:	Use only in a well-ventilated area. Avoid contact with eyes, skin, and clothing. When handling, use appropriate personal protective equipment (see Section 8). Wash contact areas thoroughly after handling. Keep away from heat, sparks, flame, and all other sources of ignition. Releases to the environment should be avoided. Observe good hygiene guidelines.			
Storage Conditions:	Store in tightly sealed containers in cool, dry, and well-ventilated			

	area. Store containers away from sources of ignition, heat, or direct sunlight.
8. Exposure Controls / Personal Protection	
Exposure Limit:	This product, as supplied, does not contain any hazardous materials with occupational exposure limits established by the region-specific regulatory bodies.
Engineering Controls:	Extraction or global ventilation. Equipment should be grounded. Provide eyewash station.
Environmental Exposure Controls:	Review and implement appropriate technical and procedural wastewater and waste disposal measures to prevent occupational exposure or environmental releases. Potential points of process emissions of this material to the atmosphere should be controlled with dust collectors, HEPA filtration systems or other equivalent controls.
Personal Protective Equipment (PPE):	Protective clothing and gloves. Eye and face protection. Regularly laundered work clothing (lab coat).
Hands:	Wear suitable protective gloves (resistant to chemical agents in accordance with standard EN374) in the event of prolonged or repeated skin contact.
Eyes:	Avoid contact with eyes. Use eye protectors (safety goggles in accordance with standard EN166) designed to protect against liquid splashes.
Skin:	Work clothing worn by personnel shall be laundered regularly. After contact with the product, all parts of the body that have been soiled must be washed.
Respiratory Protection:	Assure a well-ventilated work area. General room or local exhaust ventilation is usually required to meet exposure limit(s)
